UPPER Water repellent and breathable full grain leather with scuff-cap.

LINING **PLASMAFEEL** - Lining in 3D fabric that keeps the foot constantly cool and dry thanks to the instantaneous absorption of sweat and its immediate dispersion outside of the shoe. Breathable, antibacterial, resistant to wear and abrasion.

INSOLE **ECO SOFT** - Made from recycled materials. Thermoformed in dual-density polyurethane with atear resistente multilayer fabric. High breathability and quick absorbing for a foot that is always dry. Antistatic, antibacterial, anti fungus, the presence of activated carbon keeps the foot free from bad smells. Complete with shock-absorbing heel support to reduce impacts on the entire spine and arch support to ensure greater comfort.

OUTSOLE **PU / PU** - BASF PUR Elastopan® polyurethane foam insole, ensures the maximum comfort and the absorption of the impact on all surfaces. Bi-density PU outsole, with an elevated grip, resistant to wear, oils and hydrocarbons. System of energy absorption on the heel. It leaves no mark on the surface.

LAST The anatomical shape of the injected sole, unlike removable insoles, is unalterable for the entire lifetime of the shoe. The Anatomic sole, following the natural morphology of the foot, provides a natural support to all its points, ensuring maximum comfort

MIDSOLE **TEXON ENIGMA ZERO HT2** -Non-metallic antistatic, flexible, anti-perforation fabric insole, built with several layers of high-tenacity fibres. It ensures perfect thermal insulation Compliant with: **EN 12568:2012; EN ISO 20344/345; CSA-Z195-14; ASTM F2413-18**

TOE CAP **POWER CAP** is in multilayer fiberglass and rubber particulate. It stands out for its robustness and lightness, guaranteeing a shock absorption up to a max. 200 Joules. Being metal-free is undetectable by a metal detector, and helps to maintain a constant body temperature. It provides maximum safety even at extreme temperatures above and below zero, providing a thermal insulation that is better than aluminium or steel toe caps.

ANTI-STATIC DEVICE. **SILVER STRIP DISCHARGE (SSD).** Conductive cotton tape with silver threads, inside the upper and in direct contact with the foot. Anti-static device, it increases and stabilizes the dispersive capacity of the electrostatic charges throughout the life of the shoe.

ANTI-TORSION SUPPORT **COMPOSHANK.** Anti-torsion rigid ABS support. It is applied between the anti-perforation midsole and midsole, at the arch of the foot. It improves stability on stairs, where the support of the foot is not complete
